

Welcome to Grade 6.

My name is Mrs. Petteruti. I am a member of the middle school teaching team. I am the grade six home room teacher, and I teach sixth grade students religion, vocabulary, science and world history. Grade six students go to Mrs. Martel for math and Spanish; they also go to Mrs. Clupny for reading strategies in the content area, literature and language mechanics. I teach geography and science to grade seven students, and I also teach American history and science to grade eight students.

Grade six is an exciting year because it is the first year that Sacred Heart students are in the middle school. Students participate for the first time in the school science fair in February. Students who excel at the Sacred Heart School Science Fair are then able to participate in the Amgen Rhode Island Science and Engineering Fair in March at the Community College of Rhode Island – Knight campus. In addition to the science fair, students begin taking Spanish language classes.

Grade six students explore their religion and spirituality in many different ways. In addition to attended regular school masses, Grade six students participate in Feinsein projects, research different religious figures, learn about Christ through their textbook studies and research our patron Blessed Louis Guenella.

Grade six is also a very exciting year because it brings middle school dances and field trips. We work very hard, but we have a lot of fun.

Please come visit us!

Sincerely,

Mrs. Petteruti
