

Our Facilities

ART ROOM

We believe that creativity is an important part of learning and that it is important that our students learn to express themselves in art.

COMPUTER LAB

Computers have become an integral part of business and our daily lives. We believe that starting our students off with a good foundation in understanding computers will prepare them for whatever careers they choose for themselves in the future.

SCIENCE LAB

In our science lab, students learn about everything from nature and biology to space and chemistry.

LIBRARY

Reading is an important skill for anyone. In our library, we encourage students to discover the joys of reading.

GYM

No couch potatoes for Sacred Heart School. Exercising your body is just as important as exercising your mind. In Gym, students learn how to work on a team as well as good health.
